

MOHAMMAD SHAIKH

Liverpool, United Kingdom | +44 7437984460 | shaikh.mohammad1099@gmail.com | linkedin | github.

SUMMARY

Software Engineer with 3+ years of experience building high-performance, scalable systems across XR and full-stack. Proficient in C#, C++, Python, and cloud-native architectures (Google Cloud, Firebase, Azure). Proven track record of delivering end-to-end applications, from Unity3D XR apps on Meta Quest to full-stack dashboards, with measurable business impact. MSc Computer Science from University of Liverpool. Passionate about immersive technology, real-world automation, and systems that scale.

TECHNICAL SKILLS

Languages: C#, C++, Python, Java, JavaScript, SQL

Frameworks & Libraries: React.js, Node.js, Unity3D (XR/AR/VR), ARKit, .NET, REST APIs

Cloud & DevOps: Google Cloud Platform, Firebase, Azure, CI/CD Pipelines

Tools & Platforms: Git, Android Native Plugin Development, Mapbox, JSON Integration, Meta Quest SDK

Concepts: System Architecture, Data Structures & Algorithms, OOP, Real-Time Systems, Hand Tracking, Computer Vision, Image Processing

EXPERIENCE

TeknTrash Robotics

Mar 2025 – Oct 2025

Software Engineer

Liverpool, UK

- Engineered a Unity3D XR application for Meta Quest 3 from the ground up, enabling real-time robotic hand control via advanced hand-tracking integration, native Android plugin bridging, and low-latency input handling for sub-20ms precision interaction.
- Designed and deployed a full-stack web application (React.js, Node.js, Firebase) featuring interactive dashboards and RESTful APIs to support the company's robotic ecosystem and real-time data pipelines.
- Led end-to-end system architecture in a fast-paced startup environment; managed cross-platform UI/UX, Unity-Android bridging, and cloud performance optimizations using Google Cloud tools, earning recognition as a UK standout AI innovator by Google Cloud.

Eccentric

May 2022 – Aug 2023

Unity Developer

Mumbai, India

- Spearheaded overhaul of digital showroom applications for MG, Maruti Suzuki, and Jeep using Unity3D, resulting in a **20% increase in usage** and a **15% improvement in customer satisfaction**; reduced support tickets by 30% through streamlined UI/UX design.
- Developed a dynamic, cross-platform (Windows & iOS) analytics dashboard using Unity3D and JSON integration, incorporating real-time Mapbox and API data for operational insights used in stakeholder decision-making.
- Integrated 3D materials, meshes, and rendering pipelines into Unity3D for photorealistic vehicle visualization; implemented unit testing protocols to ensure stability and performance across releases.

Infogen Labs Inc.

Dec 2021 – May 2022

Junior Software Developer

Pune, India

- Contributed to **"Axe Throw"**: a physical-digital hybrid system using image processing and computer vision to detect axe impact positions on a virtual projected board, blending real-world interaction with digital animation.
- Developed **"GLUV"**, an AR-powered retail application built with Unity Engine and ARKit that scans and verifies lingerie sizing for in-store customers, improving fit accuracy and customer experience.
- Awarded **Team of the Quarter** for outstanding contribution to innovation and delivery excellence.

Currys plc

Jul 2024 – Present

Sales Specialist

St Helens, UK

- Strengthened communication, problem-solving, and client-facing skills through high-volume daily customer interactions in a dynamic retail technology environment.

EDUCATION

University of Liverpool

Sep 2023 – Sep 2024

Master of Science (MSc), Computer Science

Liverpool, UK

Savitribai Phule Pune University

2018 – 2021

Bachelor of Engineering (BE), Computer Engineering

Pune, India

PROJECTS & ACHIEVEMENTS

Real-Time Robotic Hand Control XR App | Unity3D, Meta Quest 3, Android Native Plugins, GCP

2025

- Built a full XR application enabling real-time hand tracking to control physical robots; involved low-latency signal handling, native Unity-Android bridging, and cloud-driven telemetry.

Automotive Digital Showroom Platform | Unity3D, JSON, Mapbox API, REST APIs

2022–2023

- Delivered interactive 3D digital showrooms and data dashboards for top automotive brands (MG, Maruti Suzuki, Jeep); boosted engagement by 20% and slashed support overhead by 30%.

CERTIFICATIONS, AWARDS & HACKATHONS

Winner – Google Cloud London Summit 2025 (gHacks Hackathon): Led development of a cloud-native solution leveraging Google Cloud services to solve a real-world problem.

HackerRank: Java (Basic), Problem Solving (Basic & Intermediate) | Data Structures & Algorithms Certification | **Winner** – JAVA Programming Competition | **Winner** – Paper Presentation | **Team of the Quarter** – Infogen Labs
